

Vehicle Fuel Types

Group Fleet HY26	
Vehicle hire (UK&I)	46,400
Vehicle hire (Spain)	74,900
Insurance Mobility Services (UK):	13,900
Total	135,200

Rental Types

Relationship & supply from 40+ automotive manufacturers, enabling vehicle hires for short to long term durations which include full service and maintenance, 24/7 breakdown recovery, road fund license and replacement vehicles for planned maintenance events. Vehicles can also be bespoke with livery and conversions where required. UK car fleet predominantly to support insurance mobility - replacement vehicle services.

Insurance Mobility Car Fleet

Mobility fleet is representative of the UK car parc in terms of featuring virtually all brands and car types. EVs feature more heavily than the UK car parc as we support the transition to net zero.

LCV Types*				Fleet Services	
	CDV Smallest commercial vehicle we operate with a payload of approximately 500Kg with a typical laden weight under 2T.				Fleet Management Services include vehicle service planning maintenance and repairs, compliance management and day to day admin support.
	SWB A mid-size general use panel van, typically up to 3m load length and able to carry approximately 1T in payload.				Telematics Northgate Telematics includes vehicle tracking, driver behaviour monitoring, cameras and fuel card integration. Combined with our telematics reporting suite, offers cost and time-savings to fleet operators.
	LWB A larger panel van with payload of approximately 1.4T, 3.5M load length and increased interior cubic capacity.				Vehicle inspection App Our inspection app supports vehicle compliance by enabling daily multi-point vehicle checks electronically, saving administration time and turning checks into a cost effective and reliable exercise.
	XLWB An extended version of the LWB typically giving 3 additional cu M load volume with similar payload to LWB.				Safe Driver A tool for use during driver recruitment and ongoing management. Includes 4-stage driver risk assessment, reporting suite for fleet managers and range of e-learning modules and bespoke face-to-face training solutions.
	Other Drop-sides, tippers, Luton vans, 4x4, crew vans etc...				EV Transition Services Includes a number of services to help fleets transition to EVs from driver training and EV suitability analysis to charging solutions for public, commercial and domestic use.
	Specialist Traffic management vehicles/ Welfare vans or other modified vehicles bespoke built to customer specifications.
