Insurance Mobility Car Fleet

Mobility fleet is representative of the UK car parc in terms of featuring virtually all brands and car types. EVs feature more heavily than the UK car parc as we support the transition to net zero.

LCV Types*

Fleet Services

CDV

Smallest commercial vehicle we operate with a payload of approximately 500Kg with a typical laden weight under 2T.

SWB

A mid-size general use panel van, typically up to 3m load length and able to carry approximately 1T in payload.

LWB

A larger panel van with payload of approximately 1.4T, 3.5M load length and increased interior cubic capacity.

XLWB

An extended version of the LWB typically giving 3 additional cu M load volume with similar payload to LWB.

Other

Drop-sides, tippers, Luton vans, 4x4, crew vans etc...

Specialist

Traffic management vehicles/ Welfare vans or other modified vehicles bespoke built to customer specifications.

Fleet Management

Services include vehicle service planning maintenance and repairs, compliance management and day to day admin support.

Telematics

Northgate Telematics includes vehicle tracking, driver behaviour monitoring, cameras and fuel card integration. Combined with our telematics reporting suite, offers cost and time-savings to fleet operators.

Vehicle Inspection App

Our inspection app supports vehicle compliance by enabling daily multi-point vehicle checks electronically, saving administration time and turning checks into a cost effective and reliable exercise.

Safe Driver

A tool for use during driver recruitment and ongoing management. Includes 4-stage driver risk assessment, reporting suite for fleet managers and range of e-learning modules and bespoke face-to-face training solutions.

EV Transition Services

Includes a number of services to help fleets transition to EVs from driver training and EV suitability analysis.
