Total	139,400

Rental Types

Relationship & supply from 40+ automotive manufacturers, enabling vehicle hires for short to long term durations which include full service and maintenance, 24/7 breakdown recovery, road fund license and replacement vehicles for planned maintenance events. Vehicles can also be bespoke with livery and conversions where required. UK car fleet predominantly to support insurance mobility - replacement vehicle services.

Short Term			UK: Insurance mobility fleet Spain: Growing B2C
Flex			Core part of offering.
12 Months+			Core part of offering.

Insurance Mobility Car Fleet

Mobility fleet is representative of the UK car parc in terms of featuring virtually all brands and car types. EVs feature more heavily than the UK car parc as we support the transition to net zero.

LCV Types*

Fleet Services

CDV

Smallest commercial vehicle we operate with a payload of approximately 500Kg with a typical laden weight under 2T.

24%

65%

Fleet Management

Services include vehicle service planning maintenance and repairs, compliance management and day to day admin support.

SWB

A mid-size general use panel van, typically up to 3m load length and able to carry approximately 1T in payload.

36%

12%

Telematics

Northgate Telematics includes vehicle tracking, driver behaviour monitoring, cameras and fuel card integration. Combined with our telematics reporting suite, offers cost and time-savings to fleet operators.

LWB

A larger panel van with payload of approximately 1.4T, 3.5M load length and increased interior cubic capacity.

15%

13%

Vehicle inspection App

Our inspection app supports vehicle compliance by enabling daily multi-point vehicle checks electronically, saving administration time and turning checks into a cost effective and reliable exercise.

XLWB

An extended version of the LWB typically giving 3 additional cu M load volume with similar payload to LWB.

Other

Drop-sides, tippers, Luton vans, 4x4, crew vans etc...

25%

10%
